The Inner Life of Foals

Over our 40 years of raising foals, we have noticed some interesting behavior. For the first few weeks, of course, the foal is concentrated on its dam. From her comes life-sustaining colostrum and milk. She also provides safety and a large warm body to

follow securely around a new and daunting, yet fascinating, world. As the days go by, the foal begins to venture further and further away from mom until he is bravely and joyously running laps around her. He even zooms a little too close to another mare and foal, quickly returning to home base.

Photos by Tod Crouter.

In time, he dares to approach another foal that has wandered a little distance from her dam. They touch noses with ears back as if to say, "Who the heck are you?" Both foals retreat to their dams. The ice though has been broken and as the days pass, pairs of foals are interacting, running races, skidding to a halt, rearing up, and kicking up their hind legs. A buck or two may follow this exuberant display.

(Cont'd from p1.)

After a month has passed, groups of foals are now getting together to romp and to groom each other. Mutual grooming is one way of bonding and of establishing a mini herd of horses of their own age. The teeth comb the hide of their buddy and transfer scent among the members of the new cohort. They spend more and more time together, only strolling home for a "belly full."

At weaning time, at about 6 months, our foals know each other well, having established dominance or submissiveness as the case may be. And although they

whinny for days for their mothers, they are secure with foal friends they know and with whom they are comfortable.

Come to think of it, are we so different? We size up newcomers with a formal handshake, and in time are greeting one another with a hug. We, too, have our trusted groups, and we, too, have our ways of maintaining our comfort zones. We do, however, lack the physiology to lay our ears back. International diplomacy might be simpler if we could!

Our Un-Pregnant Cows

As some will recall, we purchased two "open" cows from a nearby ranch. They were scheduled to go to the sale, but ended up with us because we needed to accustom our horses to cattle. It was very unnerving for our friends, family, and clients to meet cows up above the ranch and have their mounts freak out! Not fun to have your horse start to pitch, jump, and try to escape with one's tender self mounted on same!

Photo by Robert Hoskins.

After they had been with us for most of the winter, BC Hart came to the house one day and said, "I have bad news or maybe good news. One of those cows has a calf!" Sure enough. Then a few months later he told us, "That other cow has calved, too!"

The other good news is that our horses have responded well to cow therapy. In fact, one of the 2-year-olds, *Proudie*, likes nothing better than to participate in rounding up strays.

It's not every cattleman, or woman, who doubles his herd in less than six months!

Visiting Hours at the Box Hanging Three

Please call ahead! Ranch hours are 8:00 a.m. to 5:00 p.m. Monday through Friday. On Saturdays and Sundays, trainers are not available to demonstrate young horses under saddle; however, Sylvia and JD can show you weanlings and yearlings. So plan to visit Dubois soon.

POLICIES

A \$110 surcharge on each horse sold includes transfer and health certificate. This surcharge will be added to the quoted purchase price.

Terms of purchase: Personal checks are welcome as down payments. **WHEN THE HORSE LEAVES OUR RANCH, FINAL PAYMENTS MUST BE CASHIER'S CHECK OR CASH.**

We are not responsible for our horses after their purchase and departure from the ranch. We welcome a veterinary inspection of our horses before purchase at the buyer's expense.

Buying Our Horses

It has just evolved over the years that many of our owners like to choose a yearling or even a weanling from our sales list and then leave it here for boarding and training. Usually, the customer puts something down (1/3 or less) on the horse, then pays the board, vet, and farrier expenses, as well as the training fees. It is a kind of pay-as-you-go plan that suits people's pocketbooks and provides a cash flow for us. **WE APPRECIATE QUARTERLY PAYMENTS ON THE PURCHASE PRICE.** The pedigree is transferred when the purchase price is completely paid.

We urge customers to insure their horses. This makes all of us caregivers and owners feel more comfortable because occasionally accidents happen . . . very rarely, we are happy to say. We emphasize that we cannot be legally responsible for the loss of horses under our care. We take meticulous care of your new mount, and that is all we can humanly do.

Telephone Hours: 6:00 A.M. to 5:00 P.M.

We have an answering machine on 24 hours a day. Please leave a post office address if you would like to see our sales list, photos, and brochure packet.

The best times to reach us in person are any time after 6:00 a.m. but before 8:00 a.m. (when we are outside with the horses) or during the noon lunch hour. During the winter, someone is inside most of the day after 9:00 a.m. In the summer, we are outside for longer intervals. If you have received our brochure packet and have questions, we will gladly return your call. The office closes at 5:00 p.m. and we ask that you leave a message.

The best way to get a quick response is to e-mail us at mtnwalker@wyoming.com. We check e-mail throughout the day. We can e-mail jpeg photos, the sales price list, and descriptions of individual horses.

DVD Videos!!

"A Visit to the Box Hanging Three Ranch" can be ordered on DVD. In the footage, there are glimpses of our ranch, the stallions, trails, river crossings, mountain scenery, mares and foals in pasture, yearling groundwork, and much more.

After the 16-minute master tape, we add our video sales list, footage that changes as horses are born, trained, and depart.

For the DVD, we will initially charge postage only (\$5.95), and there is no need to return the disc. If we find that only serious potential buyers request DVD discs, we will continue the practice.

Short DVD. If you'd like to see one or two particular horses in more detail than is available on the "Visit to the Box Hanging Three Ranch" video, contact the ranch and order a short DVD. Those of you who leave young horses to be raised and trained here can monitor their progress by DVD.

Our Trainers and Crew

Martin Kurasz has been with us for 30 years. Before this, he trained several horses from the trotting breeds, including a mustang captured off the Wind River Indian Reservation. Martin's education to the Walking Horse's four-beat running walk came initially through "on-the-job training" and what might be called "seat of the pants" learning; that is, experiencing the feel of the gait and intuiting how to achieve a perfected running walk or rocking chair canter. Martin attended one of the late Diane Gueck's weeklong clinics in Sherwood, Oregon, for more intense learning about this breed, but he has also taken advantage of Quarter Horse clinics, saying, "You can always pick up something new or useful from someone else." A young horse "finished" by Martin is as easy riding as a colt can be.

Eric Thompson was raised in New Mexico and growing up, was always around horses. As a high school student, he worked part-time for a guest ranch. When he entered the University of Wyoming as a geology major, he worked for an outfit that took in problem horses to be rehabilitated and screened for talent. Eric is married to a native Dubois gal, Johanna Wells, also a geology major, and is part of a family that hosts the University of Miami geology summer programs. We know you will be glad to meet him when you visit the ranch.

BC Hart joined us in 2006. BC, or Billy, was raised on a ranch and does all of the things we need help with on the Box Hanging Three. He was a heavy-equipment operator with the Leseberg family construction company. He was a hunting guide and worked in the woods as a self-employed logger. He is married to Sally and between them, they have 16 grandchildren and 2 great grandchildren. We are delighted to have BC as part of our team!

Robert Hoskins came to the ranch in June 2014. A US Army veteran who served in both paratroops and Special Forces, Robert has lived in Dubois since 1999. He previously worked as a wilderness guide and horse wrangler/packer, so he's experienced with horses. Since 2014, he has worked with the foals, assisted BC Hart in the fields, irrigated, and helped with maintenance and many other tasks. He will share night foaling with Pamela Glasser. We first knew Robert when he house-sat for us when we traveled on vacation. He is a 1976 graduate of the University of North Carolina, and has a grown daughter. We are glad he joined our team and lives nearby.

Dr. Timothy Graham. During Dr. Copeland's vacation, we are privileged to have Dr. Tim caring for her practice. As we looked for a locum tenens (substitute medical person), we were referred to Tim by state veterinarian and longtime friend Dr. Jim Logan. Locum tenens is Dr. Tim's fulltime occupation. He is licensed in several states besides his home state of Wyoming. He has many years' experience in both small and large animal medicine. While in Dubois, he served the whole community as well as this ranch. Thank you, Dr. Tim!

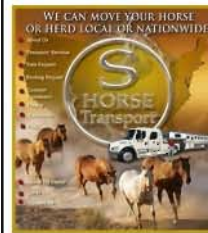

Elizabeth Dolbare. Our gardener, grounds keeper, and house keeper supreme. Liz keeps us clean and

Our Veterinarian Dr. Carolyn Copeland (right) and her assistant Debbie Leinen of East Fork Veterinary Services take good care of our horses. Dr. Copeland is available for emergencies, prepurchase exams, and all routine veterinary work.

KING WILLIAM'S HEIR

Corral Chat

The summer started with my (Sylvia's) knee surgery, total left knee replacement. Convalescence and rehab took all of my efforts, so any dropped correspondence or lost photos please chalk up to a geriatric healing process. Stopping by to visit from Nathrop, Colorado, were orthopedic recovery horse men, Richard and Nancy Bob Smith. They have both recovered and are back in the saddle.

Darrell Winston of Peyton, Colorado, chose ***Elegance Pushes West***, a *Flash* mare, and declares himself more than happy with her. She is just the size he wanted. ***Golden Oldie's Buckaroo*** migrated over the mountain to Rita Simons in Jackson, Wyoming. She declares him quite a character, and his antics enjoyed by all at her stable. Our staff member, Robert Hoskins, picked out ***Oldie's Midas Touch***. After this 2-year-old finishes his training, he will take the long journey by foot across our lane to Robert's home and barn. We plan to provide a retired horse to keep *Midas* company, and keep the grounds mowed.

Bill Seyfried of Paulden, Arizona, writes that he still has a *Midnight Allen* horse, ***Wind River Allen***, now 28 years old. "My 11-year-old granddaughter rides him every time she comes up here to visit. Otherwise he lives the 'Life of Riley'." So good to hear about an *Allen* horse surviving. We have one retired *Allen* mare left, *Midnight Alley Rose*, 27, and are happy to see her so spry and healthy.

Richard Smith on *Angel Wings of Gold*, full sister to our young stallion, *King William's Heir*.

Sylvia with Tommy Cat.

No Corral Chat would be complete without a barn cat report. One female from our previous multitude of cats returned from wherever (some 20 cats all disappeared in one night). That mama gave us a litter, two of which survived, then took off again. Coyotes, owls, wolves? Two of her offspring, *Girly Cat* and *Tommy*, are neutered now but not until *Girly Cat* gave us five more surviving kittens, most now neutered. We hope we have stemmed the tide of feline productivity and that these friendly mousers will stick around.

JD and I wish all of our far-flung horse owners and their horses a healthy and snug winter, and happy trails in the spring.

It is great that our horses are making friends for the TWH! Lisa Plaut of Estes Park, Colorado, had wonderful success in the Western Dressage Association of America World Show in September. Her horse is **Classic Royal Pride** by *Proud Classic* out of *The Allen Queen of Sheba*. Ridden by Julie K. Haugen, *Royal* won overall high point in the gaited division. Lisa writes that when Haugen is not showing him, she, Lisa, rides *Royal* "in the indoor arena where we board, zooming around in his running walk, terrorizing little girls on fat white ponies."

Julie K. Haugen riding **Classic Royal Pride.**

A Classic Venus relocated from Cedar Rapids, Iowa, where her owner needed a shorter horse, to St. George, Utah, and where the Frey family needed an aged horse for their daughter. *Venus* joins two other Box Hanging Three horses at the Frey ranch. It was good to hear from Jeanne Nichols that her mother, Patricia Harrison, now 96, still enjoys **Zorro's Lady of the Nile**. Unfortunately, Pattie suffered a fracture while cleaning her corral, so is not riding right now, but hopes to be back in the saddle when all healed up. Pattie is an inspiration to all of us elders.

Patti Harrison with **Zorro's Lady of the Nile.**

Elizabeth Zera of Spring Grove, Illinois, e-mails that due to Frank's bout with the flu, they had not ridden for a while. "Today we rode on the trail [and] the horses behaved as if they had been going out regularly. We took *Midas* and *Golda* and hope to repeat the ride with the other two, fully anticipating they will be just as good. We are even more appreciative of the steadiness of our Box Hanging Three mounts."

Laura Hart on **Classic Belle of the Ball.**

Laura Hart, daughter of Lary and Kathy Treanor of Dubois, Wyoming, visited this summer and rode their two Walking Horses. Laura e-mailed a photo of herself on **Classic Belle of the Ball**. From Germany, Regine Mueller e-mailed that unlike our horses, "*Topsy (Zorro's Top O' the Morning)* was never afraid of cows as we have a lot of cows here in Germany; unfortunately, *Topsy* was/is very afraid of sheep, goats, and pigs!" Regine, you just have to buy one of each and stable *Topsy* with them!
